User Role [?]	Usergroup [?]	Members	Default	Default Access	Color	ID
 administrator	Admin	 2		full		1
<input type="text" value="Posts only"/>	Customer 	 0	Set as Default	standard		5
	Guest			read_only		4
 <input type="text" value="Editor"/>	Moderator	 5	Set as Default	moderator		2
 <input type="text" value="Subscriber"/>	Registered 	 131	is Default	standard	default (#15)	3
Synchronize						

Note: The [Synchronize] button changes all users Usergroups according to the users Roles. For example, if you select "Contributor" Role for "Registered" Usergroup, all users with "Contributor" Role will get "Registered" Usergroup in forum. The synchronization process may take a few seconds or dozens of minutes, it depends on the number of users. Please be patient, don't close this page and wait until the progress counter says 100% completed.

User Roles

In the table above (Usergroups) you can see the list of all available forum Usergroups. The first column of this table displays selected User Roles which are synched with certain Usergroup. However some User Roles are still not synced with any Usergroup of your forum. You can find not-synced User Roles in the table below (User Roles). If you use any of these not-synced User Roles and you want to grant some forum accesses to users of these User Roles you should create new Usergroups for each of them. Once new

Categories and Forums

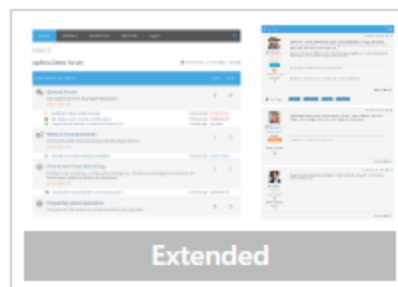

[Add New](#)

Αρχικό Φόρουμ

Αυτό είναι ένα απλό αρχικό φόρουμ

This is a forum description. This content will be displayed under forum title on the forum list.

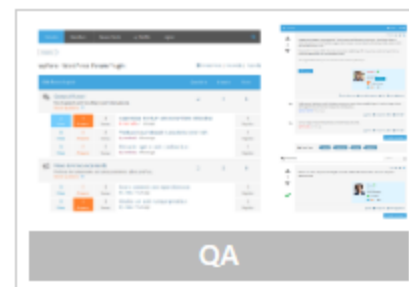

Current Layout of this Forum (inherited from parent category) ?

Extended

Simplified

QA

Threaded

i Forums can be displayed with different layouts (Extended, Simplified, Q&A, Threaded). Use the "Category Layout" dropdown located on the top right section to set the layout you want. This option is only available for Categories (top parent forums). Other forums and sub-forums inherit it. They cannot have a different layout, therefore the layout dropdown option becomes disabled if this forum is not a Category.

Forum Slug ?

archiko-foroum

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Forum Icon ?

Font-awesome Icon:

fas fa-comments

You can find all icons [here](#). Make sure you insert a class of font-awesome icon, it should start with fa- prefix like "fas fa-comments".
